

■ Docker Command Cheat Sheet

Docker Basics

```
docker --version # Check Docker version
docker info # Display system-wide info
docker login # Log in to Docker registry
docker logout # Log out from registry
```

Images

```
docker images # List images
docker search <image_name> # Search image
docker pull <image_name>:<tag> # Pull image
docker build -t <image_name>:<tag> . # Build image
docker rmi <image_id> # Remove image
docker image prune -a # Remove unused images
```

Containers

```
docker ps # List running containers
docker ps -a # List all containers
docker run <image_name> # Run in foreground
docker run -d <image_name> # Run in background
docker run -d -p <host_port>:<container_port> <image_name> # With ports
docker run -d -v <host_path>:<container_path> <image_name> # With volume
docker run -d -e VAR=value <image_name> # With env var
docker attach <container_id> # Attach
docker exec -it <container_id> bash # Exec inside
docker stop <container_id> # Stop container
docker start <container_id> # Start container
docker restart <container_id> # Restart container
docker rm <container_id> # Remove container
docker container prune # Remove stopped containers
```

Volumes

```
docker volume ls # List volumes
docker volume create <volume_name> # Create volume
docker volume inspect <volume_name> # Inspect volume
docker volume rm <volume_name> # Remove volume
docker volume prune # Remove unused volumes
```

Networks

```
docker network ls # List networks
docker network create <network_name> # Create network
docker network connect <network_name> <container_id> # Connect container
docker network disconnect <network_name> <container_id> # Disconnect container
docker network rm <network_name> # Remove network
```

Logs & Monitoring

```
docker logs <container_id> # View logs
docker logs -f <container_id> # Follow logs
docker stats # Show resource usage
docker inspect <container_id> # Inspect details
```

System Cleanup

```
docker system prune # Clean unused resources
docker system prune -a --volumes # Aggressive cleanup
```
